Subject CEE/InteliData Eco Risk

RDMS DocID 107853

Bob -

I'm forwarding an e-mail from Traci Iott of CT DEP that the ecological risk assessment can be considered complete at the former CEE/InteliData facility. This finding was based on the following:

- the eco scoping checklist which ERM completed for the facility dated April 6, 2009; and
- ERM's July 14, 2009 memo re: Results of Off-Site ERA Efforts.

Thank you for your effort on this project. Please let me know if you have any questions.

Stephanie

Subject: CEE Intellidata

I reviewed the supplemental sediment sampling data for the CEE Intellidata site. The data shows that there is currently no ecological risk do to exposure to sediments that may have been affected by previous releases from the facilities occupying the property. Thank you to Remediation staff and the LEP for following through on this important issue. This was the one outstanding item for the ecological risk assessment at this site. At this point, the ecological risk assessment can be considered complete. Please contact me with any questions.
